## (54) PRODUCTION OF 5-FLUOROCYTIDINE COMPOUND HYDROCHLORIDE

## (57)Abstract:

PURPOSE: To produce the titled compound useful as an intermediate of carcinostatic agent, antiviral agent, etc., by reacting a cytidine compound with a fluorination agent in a mixed solvent containing hydrogen fluoride and a carboxylic acid, etc., removing the solvent, and reacting the reaction product with hydrogen chloride.

CONSTITUTION: The objective compound of formula II can be produced by reacting the cytidine compound of formula (R1WR4 are H or lower acyl) with a fluorination agent (e.g. F2, CF3OF, etc.) in a mixed solvent containing hydrogen fluoride and a carboxylic acid of formula R5OH (R5 is lower acyl, halogenated lower acyl, or halogenated lower alkyl) or a halogenated alcohol, removing the solvent, and reacting the residue with hydrogen chloride.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
